

# ASAp/DCM

## *Cost-effective Job Scheduling and Console Automation*

Implementing an automated Job scheduling function and MVS console automation facility has traditionally been a very costly undertaking. Often requiring multiple products, ASAp/DCM allows for these functions to be addressed within a single solution, at a fraction of the cost of competitive offerings. ASAp allows for full function job scheduling, whilst DCM facilitates MVS console automation. Together in a single solution, these functions complement each other to provide a high level of operations automation.

### **Why Choose ASAp/DCM?**

ASAp/DCM offers many advantages over similar products:

By combining automatic scheduling with automated console operations, ASAp/DCM offers a total automation solution in one product.

It is powerful yet easy to learn. There is no need to use any programming languages.

Its extremely intuitive and flexible rules sets allow it to be used by a wide range of personnel.

Its exceptional affordability ensures that true cost savings are realised in the shortest possible time.

- Complete MVS automation in a single product.
- Advanced Job Scheduling.
- Total console and operations automation.
- Control tasks by time and date, or system events.
- Send text pages based on console messages.
- Unleash the hidden abilities of your operator consoles:  
multiple colours, blinking text, reverse video and more...
- Extremely reliable, easy to use, affordably priced.
- Integrated solution, often replaces multiple products.

With **ASAp/DCM** you can't afford *not* to automate!
